Presents:

CHIROPRACTIC NIGHT IN CANADA

Childhood Vaccination: Tough Questions for Today's Parents

Guest Speaker: Dr. Tedd Koren

Dr. Tedd Koren is a researcher, writer, author, publisher and speaker. His recent victory over the Federal government (FTC) prevented the chiropractic profession from losing its freedom to educate patients. He is the most well read chiropractor in the profession today. His seminar on vaccination asks the tough questions that today's parents are asking around the world. Questions hailed as the ideal balance between what the scientists are saying and what today's parents aren't being given a chance to reveal.

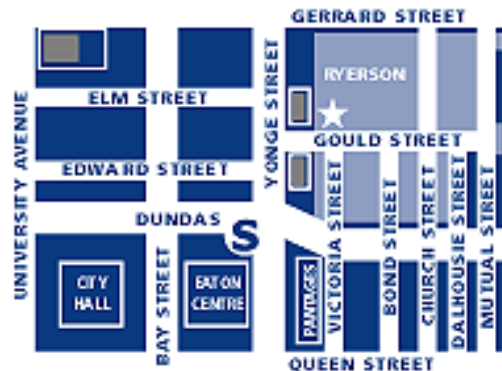

Children today receive more vaccines than ever before yet childhood illnesses and chronic diseases are climbing higher and higher. Most parents have no idea how many vaccines their children receive, the toxic relationship between vaccine chemicals & long term side effects on the developing brain & immune system and that vaccination remains a voluntary choice in society today.

Every parent and parent-to-be needs to attend this seminar and discover "The Truth About Vaccinations"

Date: Friday, November 14, 2003
Time: 7:00 p.m.- 10:00 p.m. (Doors open at 6:30)
